DJ Anhydrous Tubes

Dan Poland Machine is the sole distributor and manufacturer of the DJ Anhydrous Injector System. The DJ Anhydrous Injector's exclusive design places the anhydrous at the end of the sweep, cutting fertilizer losses to a minimum. The design also allows for fitting to most chisel plows and cultivators. The rugged exterior utilizes seamless, double and triple wall tubing for strength and durability in rocky and harsh conditions. The Injector has a history of excellent performance with most air seeders.

Improved Rotor Kit

This improved rotor kit for combines effectively prevents vines and stalks of crop plants from wrapping and binding up the rotor. This wrapping makes it virtually impossible for the combine harvester to function properly. However, this rotor conversion allows the material to keep moving through the machine for better separation, allowing for little to no chance of plugging and costly downtime.

Cranes - Dan Poland Machine also offers a 30 Ton National Crane with 110' of hydraulic stick and an addition Jib of 44'. The crane can also be equipped with one or two man baskets. Rigging and moving is also available.

Trucks - Several trucks and trailer combinations are available including this 55 ton 4 axle RGN trailer for your heavy hauling needs.

Dan Poland Machine

Dan Poland Machine shelters massive equipment and an experienced and talented crew. In addition to the skilled individuals that make up the Dan Poland team, we have a 180-ton CNC hydraulic press brake, a 95-ton iron worker, a 100-ton hydraulic press and 3/8 x 12' shear. And as if that wasn't enough, our shop boasts five turning lathes, three huge drill presses, three milling machines, and a CNC plasma table. Our specialty shop includes many custom tools fabricated straight from the inventive minds of the Dan Poland crew themselves.

Our crew normally works 5 days a week from 8am to 5pm. Each member is equipped with engineering, fabrication and welding skills from countless hours of hands on experience and training. Each one has the experience and knowledge to be versatile and flexible according to the demands of the job.

The shop is capable of handling repair work, welding jobs, machining, custom maintenance, and fabrication.

From trucking and cranes to custom fabrication and quick fixes - Dan Poland Machine is able to assist you with the knowledge, skill, and professionalism that has come to be expected from the Dan Poland Shop.

Custom Metal Fabrication - We pride ourselves in the custom fabrication of stairways, structural steel, augers, hoppers, transitions, truck beds, fuel tanks, large anchor bolts, and loader buckets. We have a Solid Works CAD program, and can fabricate from your plans or design and build your complete project.

Full Service Welding - We employ some of the most talented welders in the region in order to provide you with outstanding welding and repair - ranging from small jobs to farm equipment to construction equipment to structural steel. Dan Poland Machine has fully equipped service trucks and portable welders and is capable of handling all of your welding needs.

Material Inventory - Dan Poland Machine has sources for the hard to find parts and materials. We keep a large inventory of steel, aluminum, DOM tubing, flat iron, sheet metals, bearings, wheel hubs, auger flightings, PTO shafts, sprockets, tubing, pipe, bolts and nuts. All of which keeps the shop prepared for most "fix-it" jobs. These items are also available for over the counter purchase.

Specialty Work - Dan Poland Machine offers specialty work - from commercial projects like building snow gates, repair work on semi-trailers and earth moving equipment - to agricultural jobs such as repairing elevators and grain systems, balancing and rebuilding straw choppers, rotors and flails.

Drilling - Boaring - Rotor and Straw Chopper Blancing - General Repair - Rebuilding - DJ Anhydrou
